Leadership in Teaching Excellence(LITE)

Dr B C Roy Engineering College Durgapur has been selected as one of the Institute for AICTE's Leadership in Teaching Excellence (LITE) Programme recently. LITE is a flagship programme of AICTE, (Ministry of Education, Government of India) to strengthen the ELITE National Engineering Leadership Cadre of student software engineers and the National Education Policy (NEP) 2020 goal to bring modern software engineering knowledge through proven Online teaching-learning methods to a larger cross section of Institutions, faculties and students. Our institute is one of the 136 selected institutes out of the 475 Universities/Deemed Universities/Autonomous Institutes/Affiliated Institutes applied from all over the country. The selected institute is intended to act as **AICTE Brand Ambassador of Change and its students as change agents who are aligned with NEP 2020. Over the next few years, LITE intends to bring modern computer engineering knowledge to 24 Million children.** The LITE also aims to enable students to move beyond highly paying employment opportunities into more challenging domains of entrepreneurship. The programme is specifically designed to impart industry standard training in **Web Development** to students and bring mainstream industry knowledge into classrooms. It will open up pathways for students from all disciplines to gain access to this knowledge. Given the backdrop of global demand for highly skilled software engineers due to the accelerated digital transformation, LITE is expected to empower the students with the skills to participate in such digital transformation initiatives and our students stand a very high chance of receiving high quality employment offers post this training.
